# Weedair-Series Weedair

The HOAF WeedAir® IB series uses heated air to control unwanted vegetation on all types of paved and unpaved surfaces. A powerful air flow is evenly distributed under the insulated hood. By exposing the plant to this heat, the proteins in the weeds congeal and the moisture cells burst open. As a result the vegetation starts to wilt and die.

The compact and lightweight design make the HOAF WeedAir® IB series comfortable to operate on various surfaces. The large wheels reduce the effort required to travel on pavements, kerbs and unpaved paths. The handlebar is easily adjustable with 3 height settings to suit different operators. A simple one touch ignition starts the HOAF WeedAir® IB series. The working temperature is indicated on a digital display powered by a rechargeable battery. A battery charger is included. A stainless steel hood containing the heated air is fully enclosed and insulated all around, allowing minimal heat loss and increasing the efficiency of the fuel. The HOAF WeedAir® IBE series features electric drive to the wheels with speed control at your fingertips.
